12ft Tracer Bar 1 (Free End Long Rope) Manual

POWER REQUIREMENTS

112W @ 24VDC
Two Class 2 LED drivers required.
DO NOT CONNECT DIRECTLY TO LINE VOLTAGE!

MOUNTING

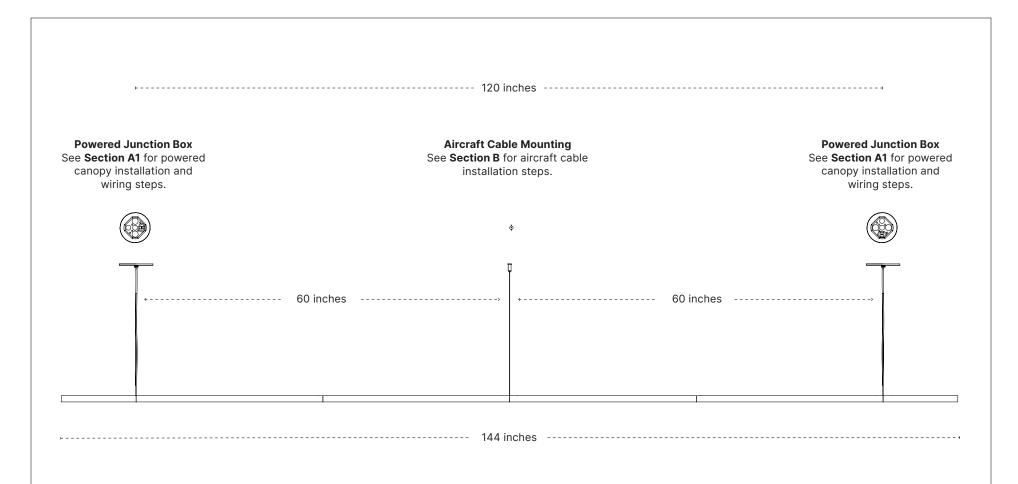

Two junction boxes (120" on center) with a central aircraft cable for additional support. Both junction boxes require power. Two remotely mounted 24VDC drivers required. Fixture weighs less than 23 pounds.

TECHNICAL SUPPORT

Need help styling the rope?
Scan the QR code to view the fixture in 3D!
Call us at the number below if you need help.

Junction Box Placement

THIS IS A LOW VOLTAGE (24VDC) FIXTURE.

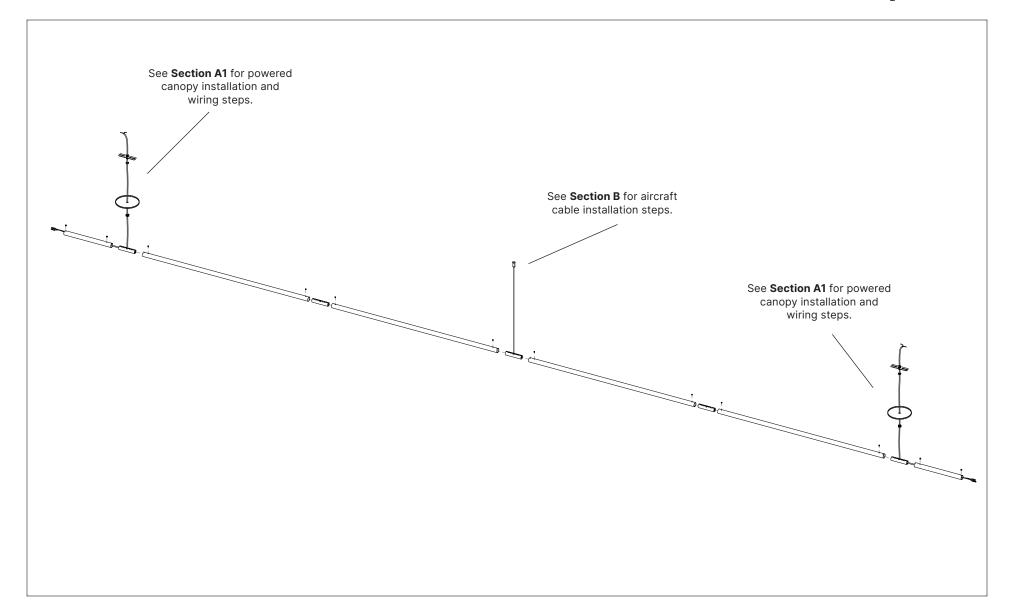

Do not wire this fixture directly to line voltage! The fixture requires a 24VDC Class 2 Transformer (LED Driver). The 24VDC driver must be mounted per the included manufacturer's instructions. Also, please ensure that the wiring system complies with NEC requirements.

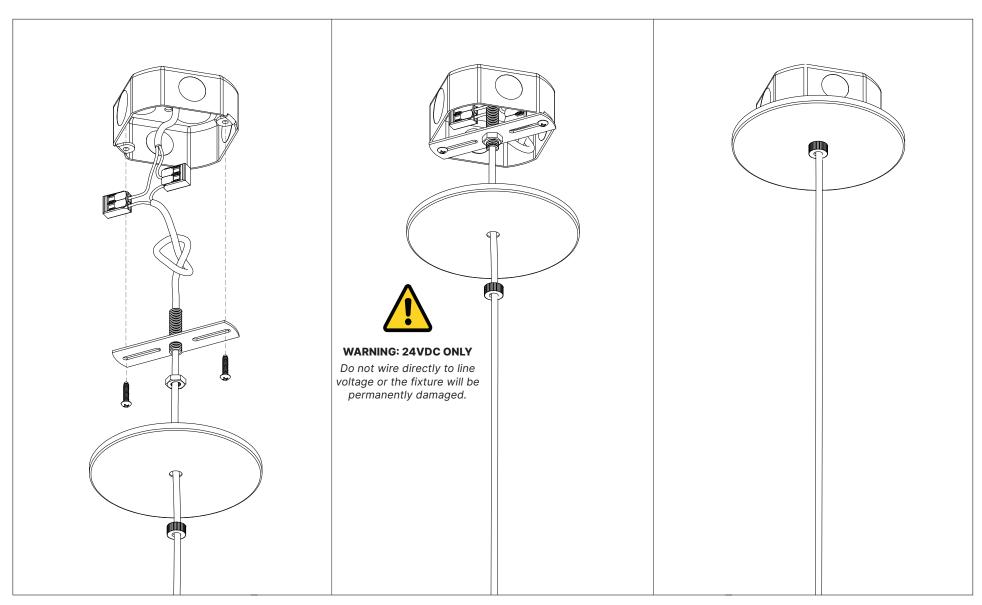

PLEASE HANDLE WITH CARE.

All protective packaging should be left on the fixture (especially the clear protective sleeve that covers the rope and frame) until it is completely installed and all nearby construction is complete. Failure to do so may result in the fixture being permanently damaged.
