Call us at the number below if you need help.

THIS IS A LOW VOLTAGE (24VDC) FIXTURE.

Do not wire this fixture directly to line voltage! This fixture requires a 24VDC Class 2 Transformer (LED Driver). The 24VDC driver must be mounted per the included manufacturer's instructions. Also, please ensure that the wiring system complies with NEC requirements.

PLEASE HANDLE WITH CARE.

Keep all protective sleeves in place until fixture installation is complete. Protect the rope from nearby paint and construction dust. Keep the entire fixture covered until all nearby work is completed. Failure to handle components with care may result in permanent damage.

WARNING: 24VDC ONLY
Do not wire directly to line
voltage or the fixture will be
permanently damaged.

Section C: Frame Assembly

Leveling mechanism may be used to raise or lower light-rope elements for best appearance.

Loosen set screw half of a turn to enable this adjustability. Tighten set screw once desired leveling is achieved.
